PG&E -- APPLICATION FOR BUILDING DEMOLITION

PG&E, Humboldt County and the Cities of Arcata and Eureka require that gas and electric services and meters be removed prior to any building demolition. This procedure insures the safety of your workers and the public by insuring that all electric and gas facilities are out of your work area.

PG&E can disconnect electric services and remove electric and gas meters within 48 hours. At least 3 weeks notice is needed to remove a gas service pipe.

Upon completion of our work and reimbursement for any re-arrangement fees (if required), a copy will be provided to you.
